## From the desk of the Principal

Education is the best way for developing the country's human potential. It is through education that we help children to reach their full potential. It is the foundation on which a country is built. NEP 2020 envisions an education system rooted in Indian ethos that would contribute to transforming India into an equitable and knowledge society.

Its goal is to make the learner a sensitive and a good human being full of compassion and courage, endowed with scientific temper and capable of creative innovations and discovery of knowledge.

Focusing on NEP 2020 we are sensitizing the children to observe, question, explore, imagine, create and live in discipline, order and harmony with surrounding. We would keep on striving to make the children feel that they are trusted and capable of shouldering responsibility. The discipline should come out self-observation, concern for others and understanding of one's personal, social and environmental responsibility.
